

UTILITY PARTNERS FOR

Water Education

Woodinville Water District is offering several fun and exciting classroom presentations in local schools to help students explore the fascinating world of water. All presentations are tailored to our region and are offered free of charge. Each class will be conducted by an experienced naturalist *Nature Vision, Inc.*, a company that spawned from the *King County Nature Connections* program. This program was the recipient of the Environmental Education Association of Washington's Award of Excellence. Classrooms in the following schools are eligible:

Northshore School District

Northshore Junior High
Leota Junior High
Timbercrest Junior High

Lake Washington School District

Kamiakin Junior High

Program descriptions are offered below. Teachers may schedule a presentation by contacting Nature Vision at 425-836-2697 or email at info@naturevision.org. If you have any questions regarding the programs or other services offered, please contact your water utility representative:

Water Conservation

(Grades 7-9)

Did you know that our area gets less rain than Miami? Join us for an interactive lesson that will explore what our society can do to conserve our water. Students will learn why we need to save water and what every citizen can do to use water wisely.

Water Supply

(Grades 7-9)

Do you know where your water comes from? Discover where your local water originates and the path it takes to your faucet! Students will explore the human and natural factors that affect our water supply.

Groundwater

(Grades 7-9)

Did you know that groundwater is an important water source for our local community? Students will explore how groundwater is connected within our larger water system, how our communities access groundwater, and what we can do to protect groundwater.

Salmon And The Water We Share

(Grades 7-9)

Discover the connection between salmon, people and the water we share. Students will explore water quality issues and why healthy salmon habitat is good for people, too!

Additional Resources

Woodinville Water District works with the Saving Water Partnership to bring water-related education to your schools. Visit www.savingwater.org and click on "Education/Resources" and then on "Kids and Teachers" to find additional water resources and field trip opportunities.
